

● 連續式細過濾機

CONTINUOUS FINE FILTER

油炸裹漿、裹粉產品必備設備

Necessary device for frying products coated with paste or powder.

機械特點

- ◆ 連續式細過濾機、可將油炸加工過程中剝落的殘渣清除、提高產品品質，減少食用油汙染延長壽命。
- ◆ 特殊網帶設計、網目達80Mesh，可將粉末殘渣完全過濾效率高。
- ◆ 不銹鋼食品級耐高溫循環泵浦、易清洗、衛生、耐用。
- ◆ 全不銹鋼機體結構，堅固好保養。
- ◆ 連續式細過濾機適用於裹粉、裹漿類產品。
- ◆ 無濾紙、無耗材。

Machine features

- ◆ The continuous fine filter can remove any residue during the frying process to improve product quality, reduce oil contamination and extend the oil usage cycle.
- ◆ Its special mesh design includes up to 80 meshes, and therefore can efficiently filter out all residues.
- ◆ Food-grade stainless steel is suitable for the high temperature circulation pump and is easy to clean, hygienic and durable.
- ◆ The whole machine is made of stainless steel.
- ◆ Its continuous fine filter is suitable for products coated with paste or powder.
- ◆ There is no need for filtering paper and consumables.
